Firian

Always well prepared.

Effective fire protection from one source.

Overview of our service package.

Fire protection means: always being prepared.

We develop, plan, install and maintain tailor-made fire protection systems. In doing so, we create a safe environment for you, in which fires are minimised and fought effectively. In our work, we ensure strict compliance with all legal regulations and requirements, giving you peace of mind.

Firian makes a crucial contribution to protecting material assets, enterprises and human lives – with extensive expertise, reliable technologies and excellent quality of service.

Firian: focused expertise for your fire protection needs.

35

150
mobile teams

12
countries

1,150
employees

Firian: focused expertise for your fire protection needs. At Firian, you benefit from our uniquely broad and concentrated fire protection expertise. We emerged from a union of three leading European fire protection specialists: ABBS + MULTIMON + TBS. The combined know-how of these three companies was unified under the Firian brand.

Our mission is to utilise this power to create safe spaces for our customers. Spaces in which they can realise their ideas and operate their business undisturbed. Because their assets are effectively protected. We have established a broad foundation for this mission: Our expert teams support you at 35 locations in 12 countries. From initial consultation and detail planning to professional installation and maintenance.

We take the fear of fire away. In doing so, we create a safe environment for everyone.

A priceless advantage for you: the outstanding Firian service network with more than 150 mobile teams.

We are always here for you – closer, more flexible, more comprehensive. Proximity to our customers is one of Firian's special strengths. At Firian, we also draw on plentiful technological resources, as we offer all established fire protection systems. On this basis, we develop a fire protection solution tailored precisely to your requirements.

Fire protection of the future? We're working on that.

At Firian, we do not wait for progress. We design it, for instance, with a targeted training programme through which we educate and support our young talent in innovative fire protection. We are actively addressing the shortage of skilled workers. And ensuring that our company remains dynamic, with ideas for the future of fire protection. Because we want to offer our customers the best performance in the industry – now and in the future.

Firian Full Service
Our service teams take care of everything that's important for the operational safety of your fire protection system: emergency service, maintenance, operator responsibilities, repair and modernisation.

Valuable experience
Benefit from our unique expertise and knowledge of industry-specific fire protection requirements in the industrial, retail, logistics and service sectors.

Rapid availability of spare parts
We have prompt access to spare parts thanks to optimised inventories. This allows us to effectively eliminate possible malfunctions.

Geographical and personal proximity
Trust and reliability are values we practice every day. We do everything in our power to meet your needs quickly and reliably.

Details of our Full Service.

Firian's diligent maintenance and repair services ensure the permanent functioning of your fire protection systems. Even many years after commissioning. So that approval and insurance protection are always guaranteed.

Maintenance and inspection

We ensure the reliable operation of your fire protection system through regular maintenance. By the way, we also offer our Firian service quality for the systems of other manufacturers.

- Weekly and monthly inspections
- Winter check including drainage of dry pipe networks
- Quarterly and semi-annual inspection (including SÜWZ)
- Annual maintenance
- 3 and 15-year inspections as well as 12.5 and 25-year inspections
- Documentation of all checks performed and work done

Emergency service, on-call service and motor pool

Our emergency service is always here for you. We eliminate technical faults quickly. So you can feel safe again soon.

- Fast, reliable help in case of malfunctions and emergencies
- 24-hour emergency service according to VdS 2132, 365 days a year
- Free Service-Hotline 24/7: 00800 - 333 474 26 (Available may vary by country and provider)

Repair and spare parts service

Firian looks after maintenance and eliminates malfunctions quickly and reliably with authorised spare parts.

- Replacement sprinklers and sprinkler keys always in stock
- Regular exchange of pressure switches, pipe-break valves and safety valves
- Manufacturer-independent logistics thanks to our own Firian central warehouse and rapid in-house fabrication

Retrofitting and software update service

Firian fire protection systems are highly durable. Technical requirements can change during this long lifetime. Functional extensions and software updates are easily possible with our systems.

- Retrofitting, programming and inspection of electric plant monitoring: higher operational reliability and reduced personnel costs, since daily visual inspections are eliminated
- Retrofitting of maintenance valves: reduction of water consumption, operating costs and susceptibility to corrosion
- Sprinkler replacement
- Pipe section replacement

Measures for compliance with FM and VdS guidelines

Through diligent inspections, we ensure the compliance of your systems with FM Global and VdS guidelines.

- Regular inspection of the sprinkler pumps and direct water connections according to VdS CEA 4001
- Maintenance of the diesel generator sets according to FM and VdS guidelines, including necessary repairs
- Recurring inspection of the compressed air/water reservoir and pipe network by experts (including preparatory measures by Firian)
- Professional commissioning and decommissioning, professional cleaning
- Visual inspection of all components
- Regular check of consumables, including documentation

Documentation service

For liability and insurance matters, proof of compliance with all regulations needs to be available at all times. At Firian, we take care of the following for you.

- VdS-relevant documentation of your systems engineering
- Preparation of revision documentation including drawings
- Documentation of work performed
- After-sales service including technical drawings and documentation as well as project execution
